SPEECH:

“Until we get equality in education, we won't have an equal society.” Sonia Sotomayor

My name is Lindokuhle Macie, a first-year student, an Independent committed to bringing fresh ideas and positive change to the SRC. Dedicated to representing all voices fairly and equally.

For a while, our university has been facing an ongoing crisis regarding student accommodation, which was a huge challenge to first-year students who come from different provinces.

Allow me to provide an anecdote: a person from Gauteng travelled 1,000 km to lack a bed space, not forgetting the learners who were sent emails for registration but had not been admitted because the university states that the space is full, by Voting for me you will allow me to change this incidents so that they will never occur, I will make sure that I will speak with the university to not just do things because of pressure and time but professionally so that there are no students who will be affected.

food insecurity is a barrier to learning because a learner cannot learn on an empty stomach. by this, I am promising that every learner who deserves and lacks food will get food parcels, irrespective of their race.

lastly, students have been defunded by our bursaries and have no plan B. By voting for me, I will make sure that there are no bursaries that will defund any student during the year.

With this information, I promise you change, even though change does not happen overnight, but gradually.

Vote for me, and I will deliver change to you
